Action Engineering has developed & refined production of Honeycomb Aluminum Pallets for 12 years. A continued focus on quality and production improvements has resulted in our ability to maintain the highest quality inventory and make custom sizes quickly.

Add **Soft Top Rubber** to your Honeycomb Aluminum pallet and you have the flattest, lightest, most print and flash friendly shirt board in the world. There's a good reason it's so popular. The only downside-it costs a bit extra. Additional Information is available on our website. [www.actionengineering.com](http://www.actionengineering.com)
