

Pocket Pallets

- ⊕ Pallets
- ⊕ Squeegees
- ⊕ Floodbars

The purpose of this pallet is to allow you to easily load & accurately print on all sizes of pockets. The pallet can also be used to print size compatible long and short sleeves.

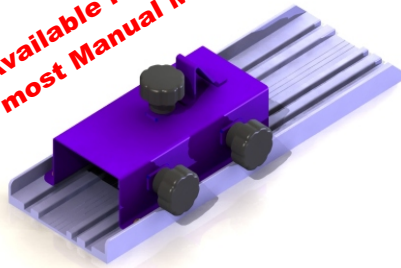

Pocket Pallets have a machined front edge which matches the geometry of standard pockets allowing you to load directly and quickly.

There is no rubber on this pallet to make the pocket loading more friendly. Heights are matched to your standard pallet height by using a shim plate between the bracket and the pallet.
