

Above the Pocket

The purpose of the Above the Pocket Pallet is to allow you to print in the area that is directly above a shirts sewn on pocket. Because the pocket is higher than the area that your attempting to print on, the tightly stretched screen will have a difficult time conforming over it.

Available for use with most Manual Machines

Simple - but effective. This Pallet allows the pocket to drop behind the rear edge of pallet. 6" x 6" available print surface. Letting the pocket drop behind the pallets edge allows you to line up the pocket edge and ensure print alignment. Dropping the pocket below the print surface is advantageous for most 'Above the Pocket' print jobs.

Available Sizes

6 x 6

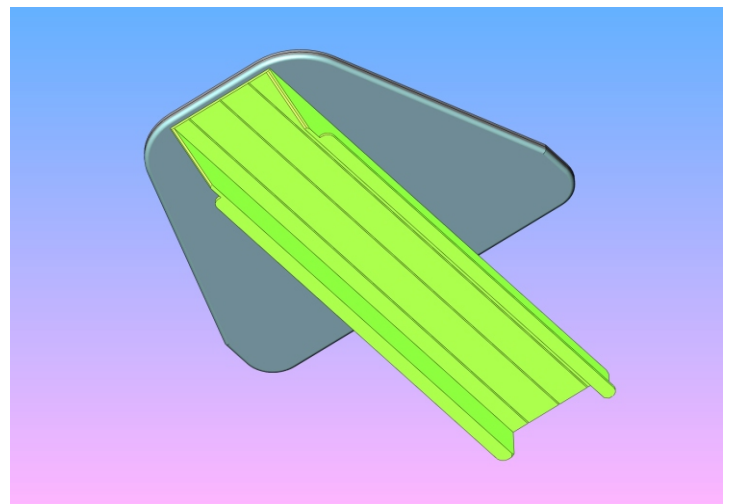

Umbrella Printing

The shape of the Umbrella Pallet was developed to allow you to print on finished umbrellas. They are available in a variety of sizes to accommodate your print and umbrella geometry.
