

Warrior Supreme Pallet System

Warrior Supreme

All-Over Wrap-Around Flip Pallet System

Pallet Features

- **Base Pallet** - Made using Honeycomb Aluminum. This material is extremely flat, rigid, and able to withstand all of the rigors of All-Over Wrap-Around Flip Printing.
- **Lift & Lower Assembly** - assists in shirt loading and unloading. Pull the red Destaco handle out and the pallet will lift to the appropriate clearance for loading & unloading. Push the red Destaco clamp assembly in and the pallet will lower into printing position.
- **Pallet Interchangeability** - is easily accomplished. Simply loosen the 2 knobs on the plastic pivot block at the rear of the bracket. Slide the locking plate back slightly & the pallet is very easily removed.
- **True AOP** - with The All-Over Wrap-Around Flip pallet - you can do true AOP over the entire surface area of the shirt and accomplish a front to back registration with only a slight gap.
